MODULAR OUTSIDE BAR

A robust mobile outside bar unit designed to withstand the elements and to be attached to similar and multiple units to form any bar length desired whilst being easily moved unit by unit.

As standard it is complete with yacht varnished 18mm plywood bar top edged with 25mm aluminium angle and two under shelf units strong enough to support a cooler or 9-gallon barrel (on a standard stillage), and bottle storage, upper shelf for till etc. The rear of the top has a timber mount for the secure locating of beer fonts.

As a bespoke unit (made to order) many options may be “built in” as required from the standard rustic 6” x 1” treated timber horizontal facier and side cladding to vertical tg&v treated boarding or horizontal shiplap boarding you’re your brand

Made to order (minimum of three weeks lead time please) and finished as standard with horizontal rustic timber spaced cladding, there are a choice of additional finish and colours, and options.

We construct engineered timber assemblies of all descriptions to order and are happy to consult with our customers to achieve the desired result.

colour paint finishes, adding integral black boards for signage, to under bar lighting and power sockets. Bar top options include oak boarding finish or vinyl tiled over ply. Regulator board and gas chain fixings may be built in.

More structural options include an above bar framework, and awnings. Matching back bar and prep counter together with optic shelving is also available.

Construction; with robust longevity in mind all timbers used are kiln dried treated (pefc) timbers, the carcass is of 3” x 2” timber frame on 3” x 3” corner posts with bolted and glued joints mounted on 4” diameter swivel castors (70kg, double ball bearing, heavy duty steel plate), 2 having locking devices. Shelving of 18mm FSC C+ timber ply mounted on 2” x 3” timber intermediate bearers.
