ROBUST TIMBER GREENHOUSE

A robust but space saving timber greenhouse designed for attractiveness and longevity with less than a 3 square meter footprint (4ft x 8ft) having a heavy duty base and “tanked” floor, auto-vented roof with 4 mm toughened glass, front and side walls half glazed with 4mm glass, hardwood sills, 14mm treated shiplap back panel and base walls finished in two coat “Cuprinol Shades” of your chosen colour.

All glazing bars finished with hardwood strips and a two coat “Sadolin Extra” durable wood-stain. The outward opening 2ft 6inch (762mm) wide by 6ft 6inch high (1981mm) softwood door is 2XG half glazed (toughened 4mm glass) and 44mm thick and is mounted in a timber frame with a 6inch hardwood sill. brass ironmongery and 2 lever lock.

Designed to be located tight to a boundary it comes complete with 75mm brown guttering and 100 litre water butt. Delivered in sections, bolted securely together and glazed on site the finished product is a complement to any respectable garden.

Construction; with robust longevity in mind all timbers used are kiln dried treated PEFC (responsibly sourced); front and rear of 45 x 70mm vertical timbers diagonally wind braced that are bolted to 45 x 45mm side sections with M6 galvanized bolts and joints lined with bitumastic sealing strips.

Base constructed of 75 x 75mm treated timbers with 22mm wpb plywood floor laid over and two coats of hardwearing floor paint finished in situ.

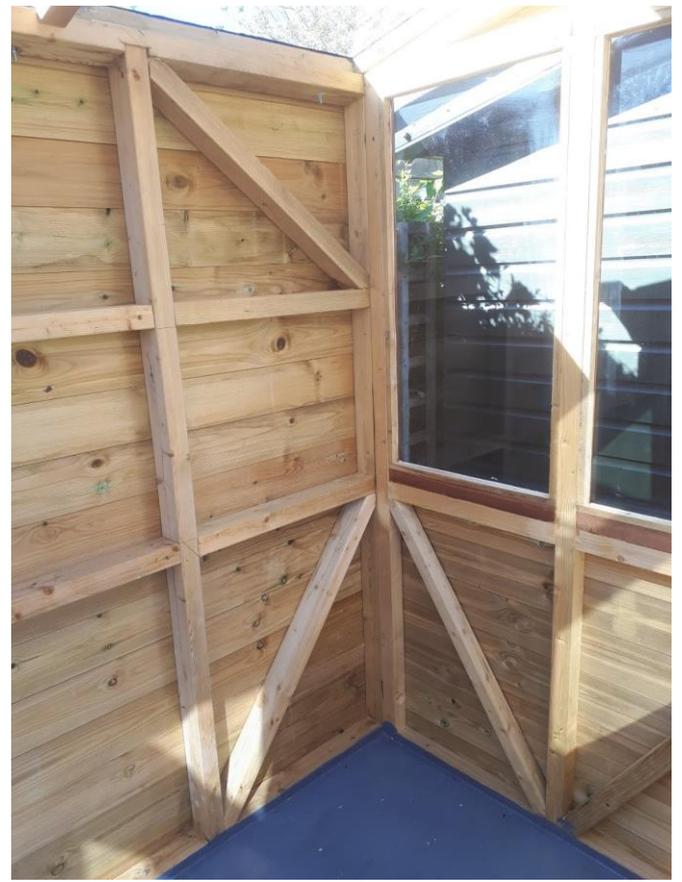

This bespoke greenhouse will facilitate many choices of internal shelving, racking and storage options constructed to your specification.

Being assembled in situ the delivery radius is within a maximum of 30 miles of Bridport. A concrete platform may be prepared upon request.

Made to order (minimum of three weeks lead time please) there are a choice of additional finish and colours, and options.

We construct engineered timber assemblies of all descriptions to order and are happy to consult with our customers to achieve the desired result.
